## **Chairperson's Comments**

Public comment session is over. My statement will not be open for comments.

### **Recap of 2025**

Last year was tragic and turbulent. 7 police officers were shot in York County. 4 were killed and 3 seriously injured. 5 of the 7 were from our NYCRPD.

It started on February 22<sup>nd</sup> with a shooting at UPMC Hospital just a few miles away. Officer Andrew Durante was killed in the line of duty. Even though he was from the West York Police Department, it had ties to our township. Our police officers responded and one was seriously wounded in the leg. He is since recovering and back on duty. The West York Chief of Police is a Conewago Township resident.

Just a few months later on September 17<sup>th</sup>, a second police shooting incident took place in North Codorus Township. 3 officers were killed in the line of duty.

Detective Mark Baker

Detective Isaiah Eminheiser

Detective Sgt Cody Becker

2 other officers were seriously injured. One from the Sheriff's department and the other an officer with NYCRPD. After multiple surgeries and rehabilitation which is anticipated to take 18 to 24 months, they both hope to return to duty.

And to add to that: we have the controversial Data Center Projects. In the August minutes, it was stated that the planning commission is meeting to discuss the data centers. Nothing came to the supervisors as yet except for the public comments recorded. When I first heard about the data center, it was suggested to go directly to the supervisors. I said absolutely not, I want as many eyes on this as possible. I said it needed to go to our planning board as well as the York County Planning Commission.

Our planning board is listening to the residents' concerns and doing their own research before any recommendations are made. They came up with some suggestions to regulate where a data center can go and put regulations on the operating of the facility.

Brian Klinger has NO input on any of this. He recused himself from any discussions. He does not attend any meetings such as planning board meeting or internal legal and planning discussions. So that being said, the responsibility will eventually go to the remaining 2 supervisors. Since it started, John and I have been harassed and disrespected. People can disagree with us but do so in a respectful civil way. By calling us names such as a "fool," "uneducated," "greedy," "corrupt" and "illiterate" are not ways to communicate. We were threatened with recalls and impeachments. I was also approached at the last planning meeting by a man that "gave me options". Option one was to get rid of Brian and put him in Brian's seat or option 2 he will run against me in 2028, take me out and take my seat. Threatening the 2 people who will ultimately make this decision is not smart. Threats and intimidation will not work. We are not the enemy; we are residents just like all of you.

So much nonsense is put on Facebook. I think there are around 6 different Facebook pages referring to the data center. The information put on there, normally I would call a lie but to be politically correct, I will call them “factual inaccuracies”. There are only 10 to 15 residents that promote these “factual Inaccuracies”. Just because you say something over and over and over does not make it true. You can say the sky is green over and over but it is not going to change, it is still blue.

My name is referenced daily, no multiple times daily on these pages.

“Lorreta said”

Bragging about the sewer rates not going up.

After the planning meeting I wrote ‘Thank you, your concerns are real and valid. We hear you. We will take a look at the website and make it more user friendly. Please attend all township meetings.’

It was also said “no disrespect” BUT Lorreta will be dead and gone and she does not care what happens to the township.’ I may not be here, but a part of my heart will always be. My sons, daughters-in-law, 4 grandchildren, one great grandson and in June my great granddaughter all live in Conewago Township as well as nieces and nephews. So yes, I do care about the future of Conewago. As far as my age, I am proud of my age and what I went through and accomplished in my life. When a baby is born, the clock starts ticking and they have an expiration date and only one person knows that date. So don’t be in such a hurry to count me out. God has plans for me.

I will never respond to any social media post again. When I do, they are never posted or are out of context or negative replies. The administrators are so biased and most of the followers just use the page for “Jerry Springer” type entertainment.

As far as text amendments are concerned, we do not have any plans as yet. Several draft texts were submitted but they were not appropriate for our township. The meeting listed as Dec 22 did not take place. It was to give our new lawyer our maps, draft text amendments, and all related important information to our new data center attorney. This was a basic meet and greet for her to get started in the new year. It was not a public meeting; it did not have to be posted anywhere. It was an attorney/client meeting. It was scheduled just 3 business days before the new year. Also, there were complaints when it was cancelled.

The wet/dry conversation went wild on Facebook. Beer distributors are allowed in the township but not to be consumed on premises.
